(Information Sensing Technologies)

Workshop on microscopy, biology, medicine, and advanced CMOS imagers

Fry, Nov 20, 2015

IST2015-64	[Invited Talk] 3D measurement using light field microscopy with improved resolution ----- Shin Usuki, Yuki Ohashi, Kenjiro T. Miura (Shizuoka Univ.)---	1
IST2015-65	[Keynote Address] All-Digital Imaging based on Photon Counting -- A Decade of CMOS single-photon image sensors -- ----- Edoardo Charbon (TU Delft)---	3
IST2015-66	[Invited Talk] Super-resolution microscopy using nonlinear light emission ----- Katsumasa Fujita (Osaka Univ.)---	7
IST2015-67	[Invited Talk] Establishment of adaptive optics microscopy for fine live imaging during the stem-cell formation in plants ----- Yosuke Tamada, Masayuki Hattori (Natl. Inst. Basic Biol.)---	9
IST2015-68	[Invited Talk] Multipoint confocal fluorescence correlation spectroscopy using a fast and high sensitive CMOS camera --- Johtaro Yamamoto (Hokkaido Univ.), Keiichiro Kagawa, Shoji Kawahito (Shizuoka Univ.), Masataka Kinjo (Hokkaido Univ.)---	13
IST2015-69	[Invited Talk] Development of multi-tap CMOS lock-in pixel imager with a high time-resolution for time-resolved measurements ----- Min-Woong Seo, Keiichiro Kagawa, Keita Yasutomi, Zhuo Li, Shoji Kawahito (Shizuoka Univ.)---	17
IST2015-70	[Invited Talk] Nonlinear Raman microscopy for biomedical applications ----- Mamoru Hashimoto (Osaka Univ.), Shoji Kawahito (Shizuoka Univ.)---	21

Sponsored by

Technical Group on Information Sensing Technologies (IST), the Institute of Image  
Information and Television Engineers (ITE)

In cooperation with

Group of Information Photonics (Optical Society of Japan) +CMOS Working Group,  
IEEE SSCS Japan Chapter, and IEICE Technical Committee on Integrated Circuits and  
Devices (ICD)
